+98 (0)936 626 59 64 amir.karimi6610@gmail.com
School of Electrical and Computer Engineering, University of Tehran, Tehran, Iran
Born on 1997/08/07 in Iran

EDUCATION

May 2022 – September 2019

M.Sc. in Computer Engineering (Artificial Intelligence and Robotics), University of Tehran, Iran

- Thesis: *Longevity Analysis of Cryptocurrency Addresses*
  I work on longevity (lifespan) of the addresses in popular cryptocurrencies (BTC, ETH, etc.) and try to fit a known distribution to this feature. I also try to find correlations between this feature and some other properties of the addresses such as turnover.
- Laboratory: Data Analytics Lab, School of Electrical and Computer Engineering
- Advisor: Behnam Bahrak
- GPA: 18.17/20 (4/4)

May 2019 – September 2015

B.Sc. in Software Engineering, University of Tehran, Iran

- Thesis: *Classification of Electrocardiogram Signals using Machine Learning & Neural Networks*
- Advisor: Siamak Mohammadi
- GPA: 18.5/20 (3.96/4)

RESEARCH INTERESTS

- Machine Learning
- Blockchain Technology
- Cryptocurrencies
- Meta-heuristics and Learn-heuristics
- Combinatorial Optimization
- Applied Machine Learning

ACADEMIC EXPERIENCE

Research Assistant:

- Research Assistant at Data Analytics Lab, University of Tehran, Iran, Feb 2020-Present.
  I did some projects to make Bitcoin transactions in P2PKH and P2SH modes and broadcast them to the blockchain. I also did some projects to make a simple application using Solidity, web3.js and Truffle framework in order to deeply understand smart contracts. Furthermore, I worked on bitcoin transaction data and analyzed some properties of the transaction graph and bitcoin addresses and tried to find correlations between them.

Research projects:

- Implementation of a Reinforcement Learning Algorithm for Mountain Car Problem, 2020.
  I implemented a Fuzzy model and a RBF model for a car stuck between mountains to help the car climb the mountains using Python and Gym.
- Design and Implementation of a Generative Adversarial Network (GAN) for Super Resolution Task, 2019.
  I implemented a GAN to increase the size of the images without diminishing the quality using PyTorch and Tensorflow.
- Implementation of a Hidden Markov Model - Gaussian Mixture Model (HMM-GMM) acoustic model for Automatic Speech Recognition Task, 2018.
  I implemented a HMM-GMM model to classify arabic digits audio dataset using PyTorch.
- Design and Implemenation of a custom CNN/RNN network for Question Answering Task, 2018.
  I developed a custom CNN/RNN network to automatically answer questions about an image using PyTorch.
- Analysis of Spotify songs popularity using Machine Learning Algorithms, 2020.
  I analyzed Spotify songs data (1920-2020) retrieved from Spotify API and used machine learning algorithms to predict popularity of the songs using Scikitlearn.

International Research Collaborations:

- Collaborating in an invited research project by the *European Journal of Operational Research* to do a review on the use of machine learning techniques in meta-heuristics for solving combinatorial optimization problems; **Collabora-**

tion with University of Lille and IMT Atlantique, France, 2021, (Role: Bibliography Review, Technical Analysis and Discussion of Machine Learning techniques, Writing).

- Designing a hub-and-spoke network under congestion: A learning based metaheuristic; **Collaboration with Kedge Business School and IMT Atlantique, France**, 2020, (Role: Integration of Machine Learning into an Optimization Algorithm, Technical Development and Implementation).
- Developing a learning-based meta-heuristic for solving a bi-objective stochastic resilient obnoxious *p*-median problem; **Collaboration with Kedge Business School and IMT Atlantique, France**, ongoing, (Role: Implementation of a Learning-based Algorithm, Writing).

Teaching Assistant:

- **Deep Learning**: University of Tehran, Fall 2020
- **Database Design**: University of Tehran, Fall 2018
- **Discrete Mathematics**: University of Tehran, Fall 2018
- **Programming Languages and Compilers**: University of Tehran, Fall 2018
- **Algorithm Design**: University of Tehran, Fall 2017 & Fall 2018
- **Data Structures**: University of Tehran, Fall 2017 & Spring 2018
- **Engineering Probability and Statistics**: University of Tehran, Fall 2017
- **Web Development**: Allameh Helli High School (Exceptional Talents), August 2017-July 2020
- **C++ Programming**: Allameh Helli High School (Exceptional Talents), August 2018-July 2019

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Rahnema College, July 2017-August 2017

- "Unagi", a location based social network application.
  In this project, I have focused on back-end development using Node.JS Express framework.

Data Engineer, Tapsell, November 2019-March 2020

- Tapsell is the leading company in the online advertising industry in Iran. During my experience at Tapsell, I implemented a Machine Learning model to map IP address of users to the location of each one. I also worked on Sauron, a module used for fraud detection and developed some heuristics to detect fraudulent users. I worked with Spring Boot, Kotlin, and Python and I got to work with big data processing tools such as Kafka streams, ElasticSearch, MongoDB and I got familiar with Apache Spark.

PUBLICATIONS

Journal articles (published)

Journal articles (under review)

- **Karimi-Mamaghan, A.**, Mohammadi, M., & Pirayesh, A. A learning-based meta-heuristic for solving a bi-objective stochastic resilient obnoxious p-median problem. *European Journal of Operational Research*.

Journal articles (Working paper)

- **Karimi-Mamaghan, A.** & Bahrak, B. Longevity Analysis of Cryptocurrency Addresses, 2021.

HONORS AND AWARDS

- **Gold Open Access award** for an *invited review* paper in the European Journal of Operational Research sponsored by EURO, 2021
- Ranked among the **top 5%** among **M.Sc.** students in Computer Engineering, University of Tehran, 2019-2021
- Awarded **full scholarship** for M.Sc. program in Computer Engineering at the University of Tehran, September 2019-May 2022

- Received **Straight Admission** without examination to M.Sc. in Computer Engineering Program at University of Tehran, September 2019
- Member of Iran's National Elites Foundation, 2015-2018
- **Awarded the FOR** (Faculty of Engineering) prise for three consecutive academic years, ranked **1st** among all **B.Sc.** students in Software Engineering, University of Tehran, 2015-2018
- Awarded **full scholarship** for B.Sc. program in Software Engineering at the University of Tehran, September 2015-May 2019
- Ranked 91 among 200'000 participants (**top 0.04%**) in the nationwide university entrance exam for undergraduate studies, (B.Sc. program), 2015

Main Courses

Machine learning	20/20	Artificial Intelligence	17.5/20
Data Analysis	17.5/20	Algorithm Design	20/20
Deep Learning	18.5/20	Bitcoin & Cryptocurrency Tech.	Coursera

COMPUTER SKILLS

Programming	Python, R, C, C++, C#, Kotlin, Java, Matlab
Optimization	Gurobi, PulP, GAMS
Libraries and Frameworks	PyTorch, Tensorflow, Scikitlearn, Gym, Django, SpringBoot
Database	MySQL, NoSQLs(MongoDB, Cassandra, Redis), ElasticSearch
Tools	git, LaTeX, Docker, Kubernetes, KafkaStreams, Apache Spark

LANGUAGE

English	●●●●○
TOFEL iBT	95/120 (October 2018)
GRE	Quantitative: 166, Verbal: 144, Writing: 4 (October 2018)
